

Ship ahoy: Van den Berg Brothers, an independent crane builder based in Sneek, in the north of Holland, built this 80t boat lift for custom yacht builder Bloemsma & van Breemen in Makkum. The crane features four 20t wire rope hoists from SWF and electric slewing. Hook height is 10m. Van den Berg Brothers' main business is electric overhead travelling cranes for factories, but it occasionally makes boat lifts, producing 15 or so in the past 20 years, according to director Frank van den Berg.
